

ChovASTAR WATERPROOFING THERMAL PROTECTOR

CHOVASTAR®

cód. 75221

Solar reflective terraces protection from damp and rain

Description

ChovASTAR® WATERPROOFING THERMAL PROTECTOR is a white dense base acrylic waterproofing product with additives reflecting 80% of sunrays, protecting your terrace from high temperatures.

It's recommended to apply as exterior finish in visitable use terraces with high sun exposition as protection from damp, rain and high temperatures inside the building.

5 kg

Installation

The surface on which is applied must be clean and preferably slightly wet. The ambient temperature should be above 5° C and no likelihood of rain.

Remove the product. Apply a first layer using a roller. We recommend extending a reinforcing mesh over the first layer. Allow drying 4-6 hours and apply a second layer. Applying a third layer is recommended.
