Preparing terraces and walls primer prior to self-sticking waterproofing sheets installation

## Description

ChovASTAR® WATERPROOFING SURFACES PREPARES is a liquid product formed by resins and bitumen in aqueous solution.

For its fast drying time, it is an ideal product to prepare terraces and walls surface before installing a waterproof self-adhesive film (Self-adhesive Politaber red / grey or Sanibric).

Not contain solvents

4 kg

## Installation

To ensure good adhesion, the support must be dry and free of solvent residues. The ambient temperature should be above 5 ° C and no likelihood of rain.

Remove the product before use. Apply a single layer using a brush and let dry 1-2 hours.
