

ChovACUSTIC® DECOTEC SOLID

CÓD. 81565 - DECOTEC SOLID

Sound absorbing plates made of melamine foam of plane geometry. Designed to reduce reverberant noise in rooms.

Melamine foam has a high resistance to temperature, a favorable behavior reable in case of fire and good resistance to chemical pipelines.

THECNICAL SPECIFICATIONS

DENSITY (Kg/m ³)	9
THICKNESS (mm)	40
FIRE CLASSIFICATION (Norma EN 13501-1)	C-s2,d0
ACOUSTIC ABSORPTION α_m (DB-HR)	0,87
DIMENSIONS (mm)	500 x 500
UNITS PACKAGE	6
m ² /PACKAGES	1,5
m ² /PALLET	60

STORAGE: The material must be protected from the elements, from sunlight and stored horizontally.

INSTALLATION

- 1- The surface must be clean, dry and free of irregularities.
- 2- Apply **ChovASTAR COLA AISLAMIENTO** glue on to the Support and on to the board. Let dry and adhere the material.

RECOMMENDED USE...

- Acoustic insulation of public premises, rehearsal spaces. Reduces the sound reverberation in a large range of frequencies.
