

### DESCRIPTION

Mineral granule and mineral shale for treating self-protected asphalt sheets with mineral finish, either granule or shale. Among these treatments, the most frequent are:

- Retouching and repairing damage caused by welding on self-protected covers with mineral finish.
- Repair of cavities or areas with detached granule in asphalt sheets with mineral coating, either granule or slate.

Said granule or slate can be adhered to the asphalt sheet after heating with a torch or after applying ChovASTAR ADHESIVO PIZARRILLA, product 72119 of ChovA S.A.

### TECHNICAL FEATURES

Characteristic granule size 0 - 2.5 mm  
Characteristic slate size 0 - 2.5 mm

### PRESENTATION OF THE PRODUCT

Mineral granule in colors:

- (1) Dark red
- (2) Green
- (3) White
- (4) Nature White

Mineral slate in colors:

- (5) Gray
- (6) Dark gray

### PACKAGING

Presentation format in bags of 5 kg, 25 kg and 30 kg.
